GO Analysis using GOdataBP for
Top 20 terms ordered by Fisher Exact
innate vocalization behavior
positive regulation of histone H4−K16 acetylation
membrane depolarization during atrial cardiac muscle cell action potential
positive regulation of calcium ion transmembrane transport via high voltage−gated calcium channel
glycerol biosynthetic process
membrane depolarization during AV node cell action potential
positive regulation of high voltage−gated calcium channel activity
positive regulation of Rac protein signal transduction
box C/D snoRNP assembly
regulation of synaptic vesicle cycle
righting reflex
negative regulation of gluconeogenesis
actin filament network formation
positive regulation of histone H3−K4 methylation
protein localization to microtubule
positive regulation of lamellipodium assembly
regulation of heart rate by cardiac conduction
positive regulation of lamellipodium organization
negative regulation of microtubule depolymerization
regulation of lamellipodium assembly
